

FMWhatsApp

APK DOWNLOAD

PRIVACY

1. You can add privacy tweaks to the App, which allows you to hide features like last seen, blue ticks, and double ticks.
2. You can deactivate the video calling feature, which is not possible in the original App.
3. You can use the app lock, which allows you to set a password for the App. That's why you can secure your data efficiently.

EXCLUSIVE FEATURES

1. This App allows you to send messages to unsaved contacts, so you don't have to save them.
2. This App allows you to pin 100 chats, instead of the original three.
3. The ability to change group colors is not present in the original app, but you have that ability.

SECURITY FEATURES

1. The App has an in-built App lock, which the original App didn't have. You can secure the App by setting a password.
2. You can secure conversations by adding pins to the chat. This will prevent other users from viewing the chat history.

Summary

If you're looking for a little more variety in your WhatsApp experience, you can try out FmWhatsApp as a side option. This App will give you all of the new features that were not in the original App. If you care about your privacy and breaking the law, then don't do the modified version.

The new and improved App can give you variety, customization and personalization, but it cannot guarantee your absolute privacy. The choice is yours. You will have to face the repercussions, so think about the advantages and disadvantages before making a decision. We can only offer suggestions; the final call is always yours.
